

No trikcs - simply feeding

Calves are
our future

The Calf-Maid is always at work

Efficient and big relief
in supplying calves
with milk
Thanks to Calf-Maid
sour-milk trolley

This innovative sour-milk trolley combines efficiency and ease-of-use. The device facilitates producing a two to three days sour-milk supply for example in the cow house kitchen, which can later be driven the calves for consumption.

Over the past few years, the labour saving sour-milk drinking trolley has experienced markedly increased interest among farmers. The approach is common – today ways and means to make reasonable use of the method are searched for.

Finnlacto has designed an innovative sour-milk drinking trolley that unites efficiency and ease-of-use. For instance, the device allows for producing a two to three days milk supply in the dairy kitchen to feed the calves with. A high-performance mixer ensures the drink's consistent quality. Calf-Maid is most suitable for mixing all powdered feed additive brands available on the market.

The special mixer creates a downward stream, which serves to prevent caking. As supply voltage, the device requires 230 VAC, i.e. it is operated with common lighting current.

Its controller has been equipped with a timer, which can be programmed to ensure the milk is stirred about four times per hour for one minute. Due to up keep heating bottom plate, the drink will be kept palatable at about 5°C above ambient temperature. A large analog thermostat display enables easy temperature reading. The device has been equipped with big wheels and is slim enough to fit through the doors. Thanks to its slim design, Calf Maid can be parked in the narrow alleys. A drain valve in its bottom facilitates the device's most easy cleaning. Made in Finland of AISI304 steel under quality control. Technical 1 year warranty.

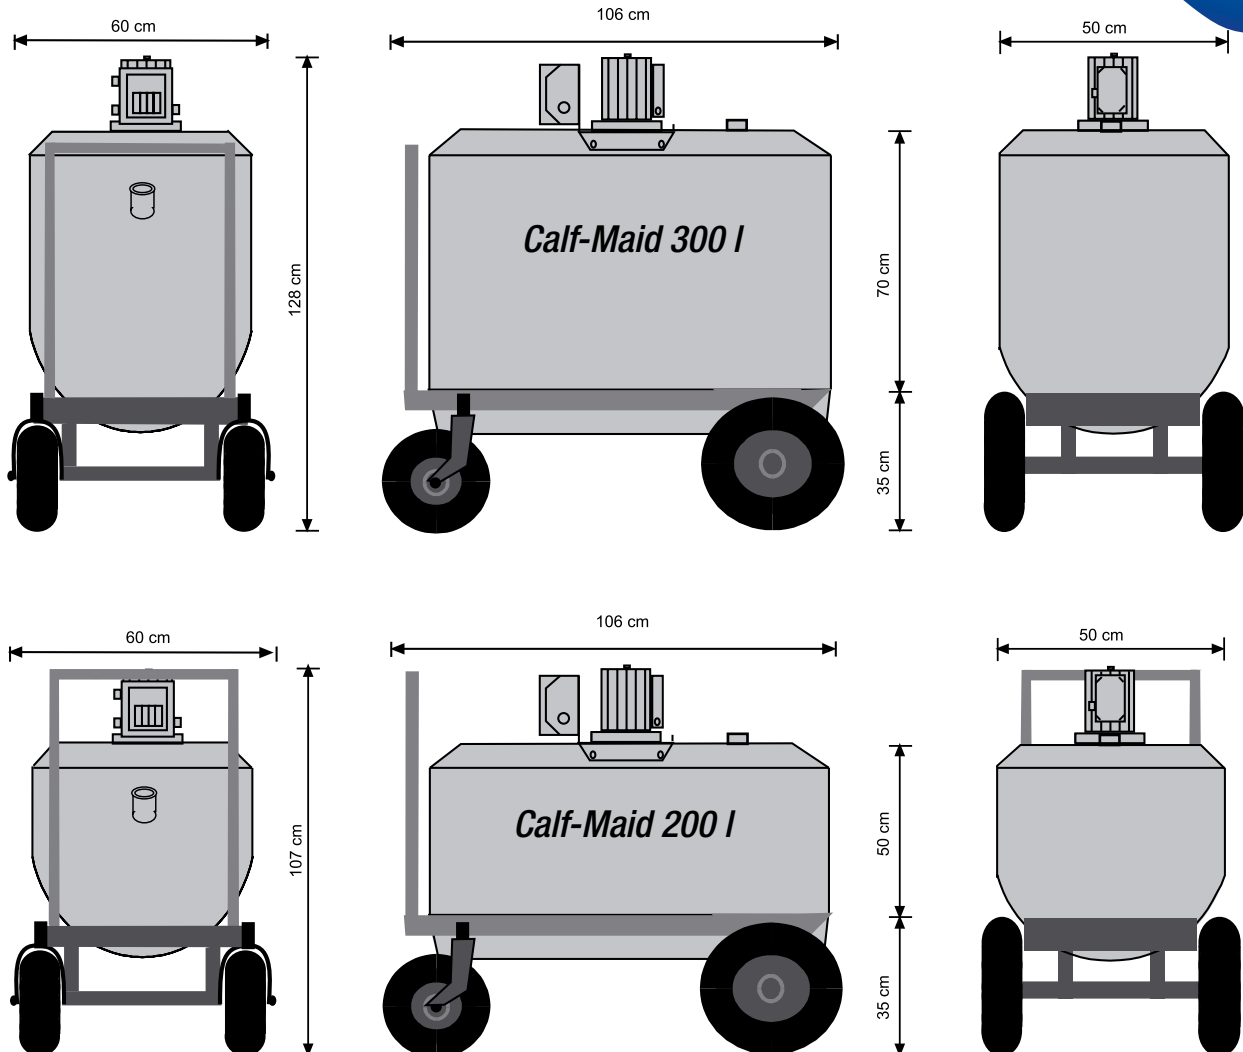

- serves to supply calves with sour-milk
- two versions available: 200 or 300 litres volume
- with or without temperature up keep heating resistor
- temperature displayed by analogue meter
- milk is mixed by robust mixing motor
- controlled blending, e.g. 4 times 1 min/hour
- controller easy to operate – automatic / manual operation
- 230 VAC supply voltage
- width of only 60 cm – fits through even narrow doors and can easily be parked in the walkway and narrow alleys
- large-sized wheels for simple manoeuvrability
- made from rust proof steel AISI304 (contains 18 % chromium CR and 10 % nickel Ni)
- most easy to clean due to bottom drain valve
- also available with opening lid for even easier cleaning
- product designed and made in Finland

No tricks - simply feeding

Calves are
our future

Technical specifications:

	Calf-Maid 200	Calf-Maid 300
Volume	200 litres	300 litres
Number of calves	10 calves for 3 days	15 calves for 3 days
Material	Rost proof steel AISI304	Rost proof steel AISI304
Controller	Asymmetrical recycler, 1 min	Asymmetrical recycler, 1 min
Mixing motor	0,37 kW	0,37 kW
Rounds/minute	1370 1/min	1370 1/min
Power supply	1~230 VAC/50 Hz	1~230 VAC/50 Hz
Temperature range	0°..120 °C	0°..120 °C
Weight	56 kg	67 kg
Up keep heating	Self regulating 320 W	Self regulating 320 W
